

FUTURE PRODUCT DEVELOPMENT PORTFOLIO

AEROX Marine's Future Product Development Portfolio reflects our long-term vision for advanced marine lubrication solutions. These planned product categories are intended to address the changing needs of marine operators, helping support reliability, efficiency, and equipment performance in demanding environments.

SYSTEM OIL SERIES

Advanced system oils planned to support the lubrication requirements of marine circulating systems and critical onboard machinery, helping maintain operational reliability and equipment protection.

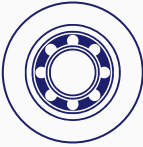

APPLICATION

- Marine Engine Systems
- Circulating Oil Systems
- Bearings & Pumps
- General Lubrication Systems

KEY BENEFITS

- ✓ Reliable Equipment Protection
- ✓ Improved System Cleanliness
- ✓ Excellent Oxidation Resistance
- ✓ Extended Equipment Service Life

STERN TUBE SERIES

Future stern tube lubrication solutions designed to support smooth vessel operation, reduce friction, and help protect critical propulsion system components.

APPLICATION

- Stern Tube Systems
- Shaft Bearings
- Seal Systems
- Marine Propulsion Equipment

KEY BENEFITS

- ✓ Reduced Wear & Friction
- ✓ Enhanced Corrosion Protection
- ✓ Reliable Shaft Performance
- ✓ Long-Term Operational Stability

AUXILIARY ENGINE OIL SERIES

Performance-oriented engine oil solutions intended for auxiliary marine engines operating under varying load conditions and demanding marine environments.

APPLICATION

- Auxiliary Engines
- Generator Sets
- Deck Machinery
- Marine Power Units

KEY BENEFITS

- ✓ Enhanced Engine Protection
- ✓ Improved Operational Reliability
- ✓ Cleaner Engine Performance
- ✓ Extended Service Intervals

ECOMARINE EAL SERIES

Environmentally considerate lubrication solutions planned for marine applications where operational performance and environmental responsibility are equally important.

APPLICATION

- Offshore Operations
- Marine Hydraulic Systems
- Deck Equipment
- Utility Systems

KEY BENEFITS

- ✓ Environmentally Responsible Solution
- ✓ Excellent Lubrication Performance
- ✓ Reduced Component Wear
- ✓ Consistent Equipment Reliability

SYNTHETIC MARINE SERIES

Advanced synthetic lubrication solutions intended to support high-performance marine operations requiring superior thermal stability and dependable equipment protection.

APPLICATION

- High-Performance Marine Engines
- Severe Duty Operations
- Turbocharged Systems
- Critical Marine Equipment

KEY BENEFITS

- ✓ Extended Oil Service Life
- ✓ Superior Thermal Stability
- ✓ Enhanced Equipment Protection
- ✓ Reliable Performance Under Demanding Conditions

ENGINEERED FOR
MARITIME EXCELLENCE

Supporting the future of marine operations through reliable lubrication solutions designed for performance, protection, and operational confidence.
